

## MY True Security Collaborate with Ease

Envision transmitting files of any size to a client electronically over 3G, 4G, 5G and Wi-Fi connections using advanced technology.

Envision your organization being in full compliance with Federal Regulations under GLBA which could save your organization from fines of up to \$250,000 per offense.

**“The difference in performance and ultimate Security is what’s under the hood”**

Our core engine platform delivers entry-to-exit security by following the six core principles of security known as the 6A’s. The 6A’s follow a holistic approach to security to ensure that your data, your users’ data and clients are protected, NO excuses.

### The 6 Core Principles of Security

- **Assess:** Inspect the users device to ensure it complies with the corporate security policy
- **Authenticate:** Identify that users are who they claim to be via 2 factor authentication
- **Authorize:** Determine which applications users are authorized access
- **Access:** Creates a secure encrypted network link between users devices and applications
- **Audit:** Who accessed documents or applications, when they did it, and what they did
- **Abolish:** Removes all traces of access to the network on completion of the session

### Multiple Authentication Methods

Strong 2 Factor Authentication to meet any Requirement

	<b>MTC-PIN Pad Smart Card</b> designed to eliminate fraud; GPS enabled. Can be used as a debit/credit card, for loyalty/rewards program and as an authentication card		Browser-based <b>MTC-Invisible Cloud Token</b> does not require any hardware to carry or software to install. Works on all major smart devices and PC's
	<b>MTC-Display Card</b> is similar to Debit/Credit PIN Pad Smart Card without the PIN Pad. Displays One Time Password upon initiation		<b>MTC-Mobile e-Token</b> software is designed for any mobile device. Entry of PIN generates a One-Time Password.
	<b>MTC-PC e-Token</b> software is designed for personal computers and laptops. Entry of PIN generates a One-Time Password.		<b>MTC-Email/SMS</b> to acquire One Time Password through smart phone or through corporate or private e-mail address
	<b>MTC-Virtual PIN Pad Smart Card</b> designed to eliminate fraud; GPS enabled. Can also be used for loyalty/rewards program		

Protection of all Endpoint Devices

Protecting Identity

Protecting Data and Network

Keeping Intruders Out

Providing Convenient Access To Multiple Resources

## Platform Independent – No Reliance on Proprietary Technologies Fast Secure Integration – Best Practices

Advanced Forensic and Permission Settings

Document View Capabilities from Any Device

Simple Drag & Drop of Files

Electronic File Sharing for Importing/Exporting Documents from External Sources

Enables Compliance Under GLBA, HIPAA, SOX and IRS Regulations
